

flying high

With an engine made for India's Jaguar fleet.

Honeywell's F125IN engine will make the Jaguar roar. It meets or exceeds all performance requirements. It achieves more power, more range and more savings. It fits into existing Jaguar airframes. Tested and available today, the F125IN engine will help propel the Indian Air Force into the future. The future has arrived.

Honeywell

The F125IN engine: Drop-fit solution | Best-in-class thrust-to-weight ratio |
Greater mission range | Increased pilot safety | Decreased pilot workload |
Shorter high-hot takeoff | Minimal thrust deterioration
