

safety matters

Zing® HUMS monitors, records and reports aircraft component parameters and advises the appropriate maintenance actions.

Total situational awareness is the key to optimum helicopter performance, enhanced safety and your bottom line.

Honeywell provides helicopter operators and crews with a 360° Sphere of Awareness with:

Zing® HUMS for internal aircraft monitoring and condition-based maintenance

Traffic Collision Avoidance Systems

The first HTAWS to be awarded a TSO by the FAA

Primus™ weather radars

Safety matters to your bottom line by: Increasing aircraft availability and uptime; lowering maintenance costs; mid-air collision and CFIT avoidance; and the ability to operate in changing weather conditions.

Honeywell – your partner in helicopter safety.
