

**Honeywell Technology Solutions Inc.**

**Honeywell**

**A TRUSTED PARTNER FOR PROFESSIONAL  
AND TECHNICAL SERVICES**

**A Proven Industry Leader You Can Rely On**

**Honeywell Technology Solutions Inc. (HTSI)** is a diverse professional and technical services leader, offering world-class competencies in management, defense and space operations, engineering and development services, logistics, information technology, security, and testing and calibration. Our deep industry knowledge, domain expertise, operational know-how, and strong emphasis on quality and safety guarantee we deliver innovative, best-value services and products across our diverse base of customers.

# Our identity and our heritage:

For more than half a century, HTSI has provided outstanding professional and technical services to the U.S. Government, foreign Governments and private industry throughout the world. Our lineage dates back to the 1950s as Bendix Field Engineering. Today, HTSI is a wholly-owned subsidiary of Honeywell, and is the corporation's largest provider of professional services. HTSI is a business unit of Honeywell Aerospace, and draws upon the vast capabilities and resources of this leading global provider of integrated avionics, engines, systems, and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space, and airport operations.

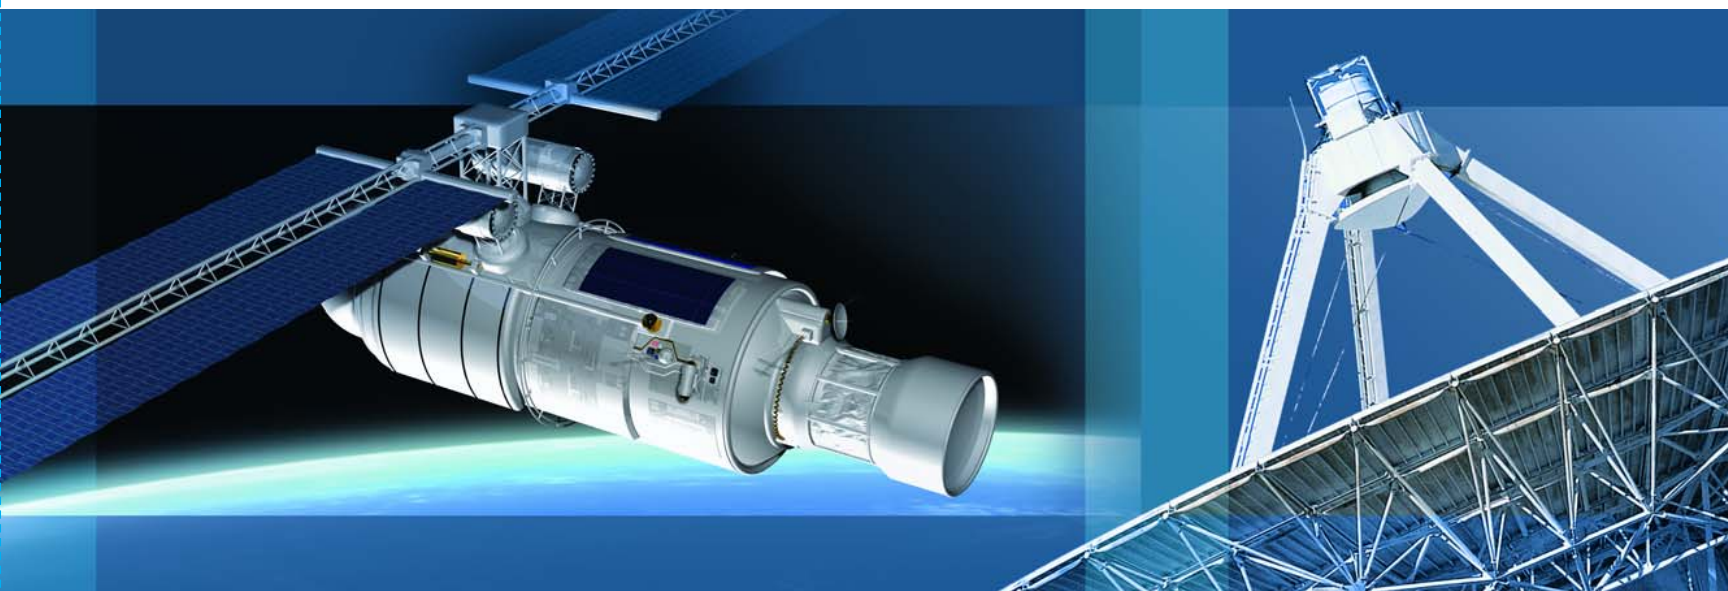

HTSI's leadership in the industry is attributed to our extensive offering of products and services and our systematic application of world-class technologies and problem-solving methodologies. Our employees are steeped in Six Sigma process improvement principles, and keep pace with the rapidly changing technological environment through aggressive training programs. Our customers benefit from our proven leadership processes, technical excellence, cost management and the highest quality standards available. We count the National Aeronautics and Space Administration (NASA), the Department of Defense (DoD), National Oceanic and Atmospheric Administration (NOAA), U.S. and foreign Governments and industry among the breadth of our customer base.

## **Space System Services**

HTSI has provided space system engineering and operations services to NASA, the United States Air Force and other Government agencies for more than 50 years. We are the principal engineering, operations and maintenance contractor for the country's two largest unclassified satellite communications networks. Our success with Government satellite missions is unmatched in the industry. Our areas of expertise include:

- Space and Mission Operations
- Space and Ground Network Engineering
- Program and Project Management
- System Deployment and Operations
- Total Life-Cycle Management
- System Sustainment
- Technology Refresh

# testimony to our ability

## **Logistics and Sustainment**

Honeywell offers Total Logistics Support consisting of:

- Expeditionary Logistics – covering supply chain and inventory management, transportation and warehouse management, and kitting, testing and calibration for prepositioned and war reserve assets.
- Depot Partnership Logistics – includes our award-winning performance-based and Total Logistics Support contracting solutions centered around Honeywell products.
- Service Product Integration Logistics – combines the expertise of all our logistics offerings into one Total Logistics offering.

Our sustainment services range from sustaining large, complex networks to keeping small sets of legacy equipment operational.

## **Information Technology and Information Assurance**

We deliver full life-cycle information technology and information assurance services, including:

- Systems Sustainment
- Independent Validation and Verification (IV&V)
- Legacy Systems Migration
- Communication Security (COMSEC)
- Information Assurance Services
- Information Security (INFOSEC) Solutions

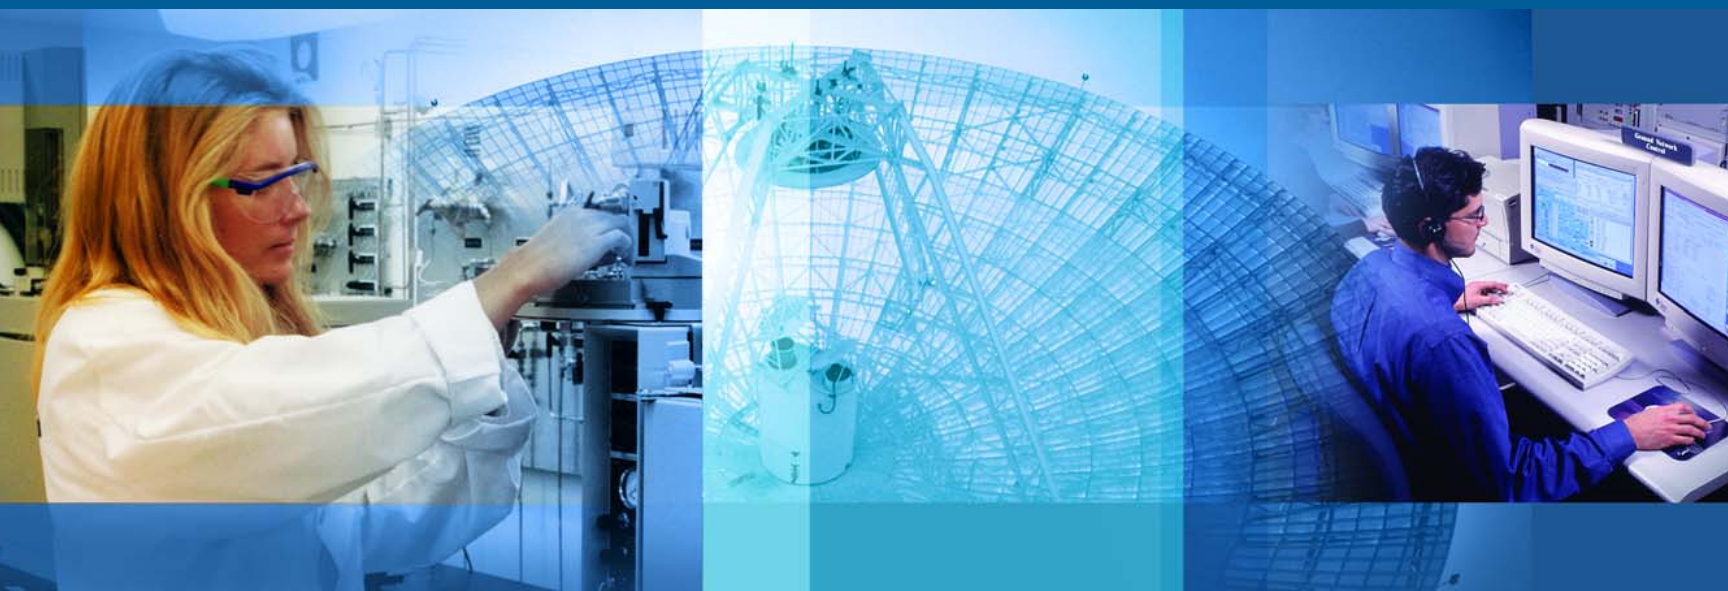

## **Technical and Engineering Services**

Our comprehensive approach to customer technical and engineering challenges is made possible through an innovative combination of technical and engineering services, which includes:

- Architectural Services
- Installation Services
- Facilities Management
- Metrology Services
- Physical Security
- Seismic Monitoring Solutions
- Six Sigma *Plus* Services
- Supplier Assurance and Factory Acceptance Testing

# Honeywell Technology Solutions Inc.

We anticipate and enhance to deliver exceptional service.

We work closely with you to assure your success by:

- Anticipating, understanding, and surpassing your requirements.
- Tailoring and delivering industry-leading best practices and technologies.
- Using our proven improvement methodologies to enhance your performance.
- Employing our support systems and processes to deliver superior service.

# Honeywell Technology Solutions Inc.

## Key Honeywell Advantages

### Operational Know-How and Domain Expertise

With direct access to industry-leading corporate best practices, a strong support infrastructure, and a rich history of working to meet and exceed customer needs; we offer the right level of engineering, technology, and support resources to quickly and effectively meet program needs.

### Proven Performance

More than 50 years of mission success with customers spanning U.S. and foreign Governments and commercial sectors.

### Systems Integration Partner

An objective combination of the best technical and operational alternatives tailored to each customer.

### Quality People

Exceptional people and teams who embody Honeywell's culture of continuous improvement and embrace our customer's mission as their own.

### Transparency

Support systems and processes that deliver faster, more complete, and accurate information to customers.
