

Responsive, Accurate, and Efficient Delivery

Honeywell

**Maritime Prepositioning Ships (MPS)
20 Years of Performance Excellence**

Responsive, Accurate, and Efficient Delivery

Honeywell is proud to serve the U.S. Marine Corps through 20 years of performance excellence. The Maritime Prepositioning Ships (MPS) Program accounts for 60% of the Marine Corps' total ground combat assets that are embarked on MPS, valued at more than \$3.4 billion.

In our 20 years supporting the MPS Program, a ship's departure date has never been missed due to delays in our schedule.

Our fill rate (attainment) of supplies and equipment has consistently been above 99% of the prescribed load for each ship, and equipment placed aboard each ship is consistently rated fully combat-ready.

Honeywell's ability to understand the Marines' demanding requirements and respond to them efficiently and affordably has earned us excellent award fee ratings. Honeywell and the USMC Blount Island Command form a winning team to support the Expeditionary Forces around the world with critical mission-ready equipment and supplies.
