**Corpus Christi Army Depot (CCAD) and Honeywell  
Defense Logistics Upgrade Chinook Performance  
to Meet U.S. Army Reset Challenges**

# Perfect Five Year Record / 100% On-Time Delivery

Honeywell Defense Logistics supports the Corpus Christi Army Depot (CCAD) to be a fully organic overhaul source for the U.S. Army's T55 helicopter family of engines. Honeywell and CCAD are working to make the depot a world-class engine overhaul facility.

The Honeywell-Army CCAD partnership focuses on upgrading the CH-47D Chinook helicopter with a new T55 engine that provides more power and better performance in hot and high environments. The Chinook is a multi-mission, heavy-lift transport helicopter used for both humanitarian and military missions to move troops, supplies, and equipment.

In the depots and in-theater, Honeywell Defense Logistics is supporting U.S. Army repair and reset requirements to improve weapon system performance and reduce total system costs over the life of the asset.

In 2007, Honeywell achieved a milestone in supporting the Army with its delivery of the 1000th T55-GA-714A gas turbine engine – Achieving a perfect five year record / 100% on-time delivery.
